Skilled at developing custom solutions to fit client needs while delivering high-quality products on time and under budget.

EXPERIENCE

WEB DEVELOPER, BURNABY, BC

Bula Lounge, June 2020–Present

- Supervising implementation project designed to improve web system
- Identifying resources to complete task, and up to date designs
- Designing flyers, post, and graphics for more cliental
- Promoted of handling entire social network in less than 4 months
- Optimized web applications for speed, scalability, and security.

TWIT–WIT, FULL STACK DEVELOPER, BURNABY, BC

BCIT, January 2023–March 2023

- Twit-Wit is a full-stack Twitter clone that was built entirely by me
- I used a variety of cutting-edge technologies, including Next.js, Tailwind CSS, Prisma, MongoDB, and NextAuth.js using TypeScript to create a polished and feature-rich application
- By leveraging these technologies and implementing industry best practices, I was able to design a visually appealing and responsive user interface, establish a scalable and robust data model, and provide secure authentication and authorization for users
- Prisma Adaptor with MongoDB as the database
- Follow, Comment, Like features
- Components created to build the interface

POKÉMON API / FULL STACK DEVELOPER, BURNABY, BC

BCIT, January 2023–March 2023

- This application was created to attach Pokémon's API to our project using Axios, as well as Tailwind was used for styling. I was the main lead in this project
- In this project, playwright testing was used for testing, as well as firebase for the login of the user
- This application gave information of all the Pokémon's in the poke verse
- I used Tailwind for styling, Framer Motion for animations
- Axios for handling API fetch calls
- Used Next JS to create this web app
- Produced websites compatible with multiple browsers
- Tested web-based product functionality and delivered iterations to customer
- GitHub link: https://github.com/Sheraliramzan/Pokemon

TRACK STACKS, MOBILE DEVELOPER, BURNABY, BC

BCIT, September 2022–December 2022

- This application was created for Users, that suffer with ADHD, where it helps in creating tasks
- This task managing application helps users to complete tasks in a fun way, where users are rewarded to do so
- I was a Full-Stack developer, who helped achieve the functionality between the client and the server, with help of Next JS, Express as well as Firebase
- JavaScript elements were used also to create components, as well an exclusive and easy to read design structure
- I Developed functional databases, applications, and servers to support websites on back-end
- Reviewed code, debugged problems, and corrected issues
- GitHub link: https://github.com/SeanHLam/TrackStacks

MUSICALLY, FULL STACK DEVELOPER, BURNABY, BC

BCIT, September 2022–December 2022

- This application was created for as a sound player, like Spotify
- I made connections, where backend was connected from Express JS and Sqlite3, Knex
- Data of users were stored in the backend from this beautiful frond-end layout
- I Used NodeJS, ORM and MySQL / Sqlite3 to develop and manage databases
- GitHub link: https://github.com/Sheraliramzan/Chillingo-music-player

PATHFINDER, FRONT-END DEVELOPER, BURNABY, BC

BCIT, January 2022–May 2022

- This application was created for Users like young adults, who suffer at a young age of becoming homeless
- This application helps users to donate as well as help these kids in need
- I was a front-end dev, who helped achieve the functionality between the client and the server, with help of Next JS, React JS
- JavaScript, Green Shock elements were used also to create components, as well an exclusive and easy to read design structure
- Languages: ReactJS, Next JS, JavaScript
- GitHub link: https://github.com/DesmandD3/finalApp
